Prominent healthtech industry executives and entrepreneurs to present at HealthTech Venture Network (HTVN) Conference at the Marriot Copley in Boston, MA.

Boston, MA (PRWEB) August 20, 2014

HealthTech Venture Network (HTVN) Conference 2014 will convene business leaders, physicians, entrepreneurs and potential investors to discuss the latest innovations in the HealthTech Industry this Saturday at the Boston Marriot Copley. Keynote speakers include Dr. Kingsley R. Chin, CEO of SpineFrontier, David Frenkel, Chairman and CEO of iHope Network, Michael Drues, President of Vascular Sciences, Dr. Steven Locke, Course Director and Faculty Member of Harvard Medical School and the Division of Health Sciences and Technology at MIT, and Jerrold Shapiro, President and CEO of Fem-Medical.

The response we have received from the healthtech community to hold this conference has been incredible. The ultimate goal of the HTVN is to bring together the greatest minds within this quickly growing industry, brainstorming new innovations and improving existing technologies. This conference is the beginning of a new network that nurtures creativity in the healthtech market. Dr. Kingsley Chin

Entrepreneurs will have the chance to take the stage as well, presenting new ideas to a panel of industry executives in the style of the popular television show, Shark Tank. This dynamic, fast-paced part of the Conference gives anyone with a big idea the chance to present their ideas in front of a live audience, gain critical feedback from experts, and discover networking opportunities and capital investment. After the Elevate presentations, the audience will have the opportunity to ask questions, and the panel of industry experts will offer feedback to each presenter.

The Conference is being held on August 23, 2014 from 9am-3pm at the Boston Marriott Copley Place, 110 Huntington Ave. Boston, MA 02116. It is free to attend and requires online registration at on EventBrite. Breakfast and lunch are provided.

HTVN fosters an ecosystem of leaders in the healthcare technology industry, connecting everyone who works on the forefront of this emerging industry from established industry veterans to new entrepreneurs; HTVN creates an environment where new innovations are born every day.
